

CO2 LASERS

AcuPulse CO2 Laser

The flexibility of the CO2 laser fiber allows you to address a broad range of clinical indications in the operating room and in the outpatient environment. We provide you with a full suite of CO2 surgical tools that are designated to precisely target hard to reach anatomy and to address delicate clinical indications related to Head, Neck, Otology, GYN and general surgery pathologies.

Sharplan CO2 Laser

We specialize in general surgical laser applications with our 120mm handpiece and GYN and ENT procedures with our micromanipulator. The micromanipulator can adapt to either Zeiss or Wild/Leica microscopes and is used for precision micro-laryngeal and lower GYN procedures as well as some general applications.

Clinicon "Pure Beam" CO2 Laser

This competitive laser to the Omniguide CO2 laser offers ENT, GYN, and Neuro Surgeons unparalleled precision with a reusable titanium coated fiber waveguide system and single use tips specific to a wide variety of surgical specialties from Stapedectomies to Da Vinci robotic applications. This system is the most cost effective fiber optic CO2 laser system on the market.

Clinicon Pure Beam CO2 Laser

CO2 LASERS

Fraxis DUO

Fraxis DUO is a combination CO2 laser and micro-needle fractional RF technology for the treatment of scars and photo-aging. CO2 fractionals enables intense superficial stimulation and micro-needle fractional RF provides higher volumetric heating and deeper heat diffusion.

Coherent UltraPulse CO2 Laser

This is one of the finest lasers in the industry for CO2 surgical applications. We specialize in GYN and ENT procedures with our upgraded Coherent/Nejot variable spot size laparoscopic coupler or our I.C. Medical "Sureshot" laparoscopic coupler that we can adapt to your operative laparoscope. We also offer our own operative laparoscope if needed. For ENT microscopic cases we offer the Clearspot micromanipulator. This is available for precision micro-laryngeal and neurosurgical applications as well as general applications. This laser is also one of two types of aesthetic skin resurfacing lasers we have for aesthetic surgery.
